

Classifying Quadrilaterals

↳ 4-sided
Polygon

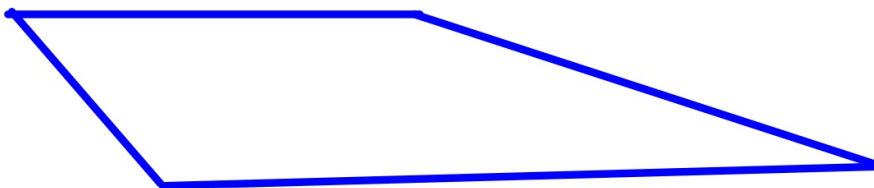

Trapezium

has no parallel sides

Trapezoid

1 pair of parallel sides

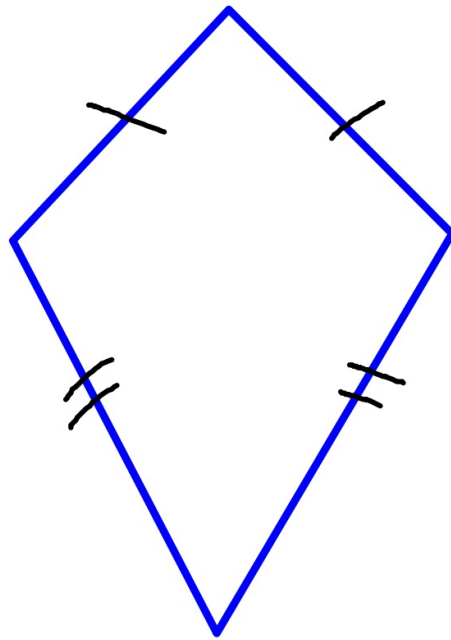

Isosceles Trapezoid

if non-parallel sides are equal

Kite

2 pairs of adjacent sides are equal

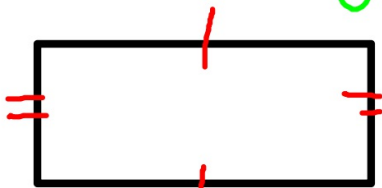

Parallelogram

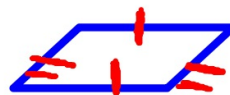

2 pairs of parallel sides

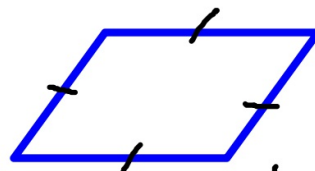

Rectangle

parallelogram
with 90°
angles

Rhombus

parallelogram
with 4 equal
sides

Square

Parallelogram

4 equal sides
and 90° angles
